Rohingya Book 2 is the second Rohingya language text book of its kind for beginners. Having used only 28 Latin letters, Rohingya is the most intuitive Rohingya Writing System (RWS) for the Rohingya People of Arakan State of Burma (Myanmar). The writing system has been officially accepted by ISO on 18th July 2007 and awarded ISO code “639-3 rhg”. Rohingya is an ethnic Muslim minority of Arakan State and they are culturally and linguistically different from any other ethnic groups in Burma.

Historically, the first Rohingya writing system began using Arabic script in the year 1650. Later in the year 1983, a Hanifi-script was introduced to solve the reading problems found in Arabic script. However, in the year 2000, a very innovative writing system known as Rohingya was founded by Eng. Mohammed Siddique Basu solving all the writing problems and making the language the easiest to learn, and now it is being used worldwide as a de facto standard. It has been designed such a way that it takes virtually no time to learn as the writing and the reading exactly match to each other. It uses only few letters A to Z, Latin letters Ç (retroflex r) and Ñ (nasal sound) including five accented vowels á é í ó ú.

The first few pages of the book includes the Alphabet table, Sample vowel list, Examples of different word patterns and The language concept chart to help teachers convey the language concept followed by step by step illustration with pictures. It is suggested that the basic concept of the vowels be explained to the students before starting the actual lessons. The teachers can access many different online tutorials available to master the concepts.

Eng. Mohammed Siddique Basu is professionally an Information Technology Engineer who developed Rohingya writing System from scratch in the year 2000. Born in Buthidaung in Arakan State of Burma (Myanmar), his writing system has been awarded and recognized by ISO (International Organisation for Standardization). He is the founder of Rohingya Language Foundation which is a charity organisation working for Rohingya literature. He is now working on the development of Rohingya Dictionaries, Holy Quran Translation, School Curriculum Books and many others in Rohingya. His aim is to develop a series of Rohingya Language books to use at schools.
